### About Me

After finishing my University studies doing Creative tech, I found myself spending more time doing extra programming work any chance I had, using online resources to guide me.

I interned as a junior web developer after graduating from university, this opportunity showed me how much I enjoyed learning tech skills, problem-solving and that I wanted to pursue a career in software development. I then attended Dev Academy Aotearoa to work on my software skills and my ability to work effectively in large and small teams. I love learning and solving problems and being able to share that with others and have them share that with me.

### Experience

#### Student - Certificate of applied software | Dev Academy

January 2023 - May 2023

- This is a high-intensity 17-week program that replicates a development team environment. We learned new technologies and how to use them effectively almost every week, these included HTML, CSS, JavaScript, TypeScript, React, Redux, Express, Knex, Handlebars, jest, Supertest, and SuperAgent. We learned by doing, we build projects in pairs and teams using Github to collaborate.
- The programme taught us human skills as well, such as how to work in a team effectively, using skills such as active listening and giving and receiving feedback. Every Friday we would group in fours to build a quick fun project to practice working in different roles of a team
- For my final project, ([link](#)), I worked in a team of four using agile methodology. We build a game similar to Telephone but using drawing. In this project, I was working as Project Lead which included building the canvas for the drawing, working on the backend and the testing of the database and routes. We did a lot of planning which I learned is super helpful when being able to assign jobs and make sure there are no missing pieces to solve. Using agile I could jump around the team and help get people unstuck so I learned a lot about the full picture of the app and how each piece worked together.

#### Junior Developer | Daylight Group

August 2022 - December 2022

- Developed proficiency in building and updating websites using Webflow, including integrating Shopify and Webflow for seamless customer experiences.
- Demonstrated my ability to work effectively in a team, including developers and creatives, to deliver high-quality websites that meet clients needs and specifications, showcasing strong teamwork and communication skills.
- Acquired valuable experience in planning and executing front-end designs for responsive layouts, working closely with a senior front-end expert to develop skills in optimizing user experiences.

## Retail Sales | Tarocash

August 2019 - November 2022

- Cultivated excellent customer service skills through daily interactions with a diverse range of customers, fostering positive relationships and ensuring high levels of satisfaction.
- Developed adaptability and flexibility through working across multiple stores and quickly adjusting to new environments, procedures, and customer needs.

## Education

Bachelor of Creative Technologies, Minor in Motion Capture | AUT

March 2019 - November 2021

- Future Environments award for Creative Technology
- Worked in teams to use technology to solve real world problems through multiple mediums such as film and software.

## Mount Aspiring College

February 2017 - December 2018

- Outdoor Education programme focusing on teamwork and trust in extreme outdoor environments rock climbing, white water kayaking, and backcountry snowboarding

## Mount Albert Grammar School

February 2014 - December 2016

## Interests

I love to do anything in the sun and to stay fit like going to the gym. Big fan of the outdoors in both seasons. Snowboarding, hiking, swimming, anything water related. I also don't mind a day indoors in bad weather reading or building personal projects.
